FOR IMMEDIATE RELEASE

DRB® Introduces AI-Enhanced License Plate Recognition for the Most Accurate, Efficient Car Wash Operations

Akron, OH – October 16, 2024 – DRB, a Vontier Company (NYSE: VNT) and leading provider of car wash and vehicle care technology, is excited to announce the launch of its AI-enhanced License Plate Recognition (AI-LPR) system, a significant upgrade to its already advanced LPR technology. AI-LPR promises to set a new standard in operational efficiency, accuracy and customer satisfaction at car washes.

"Our new AI-enhanced License Plate Recognition solution represents a major leap forward in car wash technology, delivering accuracy that traditional solutions can't match," said Patrick Mulcahy, DRB VP of Engineering. "By harnessing the power of artificial intelligence, AI-LPR is making an impact on real-world performance. Our AI engine adapts to the varying conditions faced by car washes—from different levels of vehicle dirtiness to changing weather and lighting. This adaptability significantly enhances accuracy and efficiency for operators while ensuring a superior experience for their customers."

The new AI-LPR system integrates state-of-the-art artificial intelligence firmware into DRB's LPR cameras, offering unprecedented accuracy and efficiency in reading license plates.

Key features of DRB's AI-LPR system include:

- Up to 99.9% Accuracy in License Plate Recognition: Powered by AI, the system can achieve near-perfect read rates, delivering accuracy that continually improves over time for unmatched precision.

- Enhanced Operational Efficiency: The AI-driven accuracy significantly reduces the number of unreadable plates, keeping traffic moving and allowing operators to process more vehicles without delays.

- Fast Adaptation to New Plate Styles: AI-LPR quickly learns and adapts to new license plate designs, improving read rates for unique or updated plate styles and reducing manual intervention.

"This launch is an example of the innovation DRB continues to bring to the market," said Devon Watson, President of DRB. "We're constantly pushing the boundaries of what's possible in the car wash industry, and our AI-LPR system demonstrates our commitment to helping operators run highly efficient operations and provide a great customer experience."

About DRB
As the car wash technology leader for 40 years, DRB is the ultimate partner for operators who seek rapid ROI, unparalleled membership growth and unwavering reliability. Our technology is designed to give operators the tools they need to maximize their car wash investments. From groundbreaking point-of-sale technology to marketing automation that drives traffic, DRB enables data-led business decisions and scalability that helps car washes thrive while delivering extraordinary customer experiences. Choosing DRB means connecting with a partner that is
