

EZ Trak[®] by Unitec

Easy Tracking for Dealership Car Washes

EZ Trak is a drive-up entry system, developed by Unitec[®] specifically for the automobile dealer market.

Customer Convenience

EZ Trak comes standard with 100 accounts, accessed by codes or EZ Trak cards.

Flexibility

EZ Trak has five resettable counters that allow usage to be monitored and tracked. The system can be utilized through cards or codes that are assigned to drivers or departments.

Marketing Options

Dealers have the option to market their car wash for use by rental companies, neighboring dealerships and businesses.

Efficiency

Designed to integrate with the dealer's local computer network, EZ Trak requires 24 Volt AC or DC power, an internet connection and web browser. In cases where EZ Trak must function using a 120 VAC power source, an optional power supply is available.

Security

EZ Trak utilizes a password-protected programming and reporting function that will control costs while securing access.
