

Tablet Touchscreen Terminal™ (TTT™)

Small Enough for Anyone, Tough Enough for any Car Wash

Our lightweight but rugged, user-friendly Tablet Touchscreen Terminal™ (TTT™) is a portable point-of-sale terminal and a powerful marketing tool rolled into one.

As a POS Terminal

- Increases productivity by allowing you to enter transactions directly into your DRB® POS system without leaving the customer's vehicle
- Clears credit cards in less than two seconds using Xpress Card Clearing®
- Integrated barcode reader scans barcoded coupons and windshield tags for prepaid and monthly pass sales

As a Sales and Marketing Tool

- **Improve Sales and Customer Service:** Information about the sale, the customer and more is at your staff's fingertips.
- **Create a Positive Impression:** Show customers your menu digitally on the full-color screen of the TTT.
- **Promote Specials:** The digital messaging on the TTT screen can be changed quickly and easily, making it simple for you to promote short-term specials. For example, you can use the screen to market discounts on upgrades to boost ticket average on slow, questionable weather days.
- **Seasonal Themes:** It's also simple to add menus with seasonal themes for holidays like St. Patrick's Day or Valentine's Day to your TTT menu display.
- **Build your Digital Marketing Lists:** The on-screen keypad makes it simple to enter customer email addresses and phone numbers so you can add them to your opt-in lists.

Features

- Intuitive touchscreen with included stylus. The colors, text and items sold on the “buttons” are customizable by you.
- Bright 8” display screen with LED backlighting and anti-reflective screen treatment for easy viewing.
- Integrated magnetic stripe reader for reading magnetic stripe cards (both financial and non-financial) securely
- Integrated Bluetooth technology for connecting supported peripherals (receipt printer and EMV reader) for a seamless, wireless point-of-sale solution
- Integrated barcode scanner to read barcoded coupons, prepaids and unlimited monthly passes
- 8MP integrated rear-facing camera for taking pictures of vehicles for CarPics®
- Water resistant with IP65 certified, sealed all-weather fanless design and solid-state drive
- Raised bezel and ruggedized corners for LCD impact protection
- Shock resistant (5’ drop)
- Weighs only 2.06 lbs. (with scanner) and measures under 10” x 6”
- Long-lasting battery that lasts up to 14 hours at full charge
- Back hand strap for comfortable handling

SiteWatch 26.3 or later is required for the TTT.
